

PUBLIC SECTOR ENGAGEMENT

Public Sector Technology

Senior technology leadership shaped by three decades inside how public sector decisions actually get made.

WHEN YOU NEED THIS

A public sector programme is moving through a governance structure built for accountability rather than speed, and the technology leadership in the room has never worked inside it before. Delivery partners promise timelines that assume a private-sector decision cycle. Or a department needs a senior technology voice who understands procurement, political sensitivity and multi-stakeholder governance well enough not to be surprised by them.

THE ENGAGEMENT

Fractional, interim or advisory technology leadership shaped for public sector conditions, where the barriers are as often organisational and political as they are technical. Available across central government, health, justice, education and home affairs. Working alongside existing teams to translate between technical delivery and the governance, funding and accountability structures that shape whether it actually happens.

WHAT YOU RECEIVE

Senior technology leadership that does not need the public sector context explained to it. Realistic programme and procurement timelines, tested against how these decisions are actually made. Delivery partners held to account by someone who has sat on the other side of that relationship.

WHAT IT CHANGES

Programmes stop being planned against timelines that ignore governance reality, and stop losing months relearning lessons the sector already knows. Technology decisions get made with the political and organisational dynamics named up front, not discovered mid-delivery.

ENGAGEMENT DETAILS

FORMAT	Fractional, interim or advisory
LOCATION	Remote and on-site
SECTORS	Central government · Health · Justice · Education · Home affairs
COMMERCIAL BASIS	Day rate, retainer or fixed fee
